## EDUCATION

### **B.E Computer Science and Engineering (Artificial Intelligence and machine Learning), Artificial Intelligence And Data Science**

Suman Ramesh Tulsani College Of Engineering, Pune  
2022 - 2025

### **Diploma, Coding**

Guru Gobind Singh College Of Engineering And Research  
Centre, Nashik  
2019 - 2022  
Percentage: 83.60%

## INTERNSHIPS

### **Contributor**

GirlScript Summer Of Code, Virtual  
May 2023 - Present

GirlScript Summer of Code (GSSoC) is an exciting and inclusive open-source program that aims to provide a platform for students to gain valuable experience in coding and contribute to real-world projects.

### **Web Development**

Codeclause, Virtual  
May 2023 - Present

It is organized by CodeClause, a renowned tech organization known for its expertise in web development and software engineering. During the internship, participants work closely with experienced mentors who guide them through real-world projects

## TRAININGS

### **MERN Stack**

udemy, Online  
May 2023 - Present

MERN stack combines MongoDB, Express.js, React, and Node.js. It enables efficient full-stack JavaScript development. MongoDB offers flexible data storage. Express.js is a lightweight web app framework for Node.js. React allows dynamic user interfaces. Node.js executes JavaScript on the server-side. MERN facilitates end-to-end web app development, code reusability, and rapid prototyping. It's suitable for real-time updates, single-page apps, and handling large data. MERN has a strong community, extensive libraries, and tools. Create scalable, modern apps with MongoDB, Express.js, React, and Node.js.

## Python

YouTube, Online

Feb 2023 - Mar 2023

In this program i am learn the various module of python as well as i am building the some awesome project which is hosted on github.

## Android Application Development

COLLEGE, Online

Dec 2017 - Jan 2018

I am doing this internship in my college. In this programme I am learn how to build apps using java language also how to handle database when user enters the information.

## PROJECTS

### Portfolio Website

May 2023 - May 2023

<https://bj-portfolioweb.netlify.app>

This project is a portfolio website that can be built using HTML, CSS, and JavaScript.

The website is designed to skills, and achievements in an organized and visually appealing manner.

### Unit Converter Website

May 2023 - May 2023

<https://bj-unit-converter.netlify.app>

Unit Converter: Easily convert between units of measurement. Quick, user-friendly interface for length, weight, temperature, and more. Simplify complex conversions effortlessly. Save time and effort.

### Snake-Water-Gun game

Feb 2023 - Feb 2023

<https://github.com/bhaveshjadhav/Snake-Water-Gun.git>

This is a very quick and Easy Snake Water Gun game which is very much similar to stone paper scissor. This is a good program to play the snake water gun game offline.

## SKILLS

### C++ Programming
